The Connecticut Housing Finance Authority is inviting applications for a full-time Software Developer position. The Software Developer will be responsible for providing application development, including designing, coding, testing, deploying, documenting and supporting of new and existing database driven applications.

Examples of Duties: Maintain, adapt, and update existing applications to meet user requirements and to enhance program efficiency. Modify existing applications or create new programs of moderate complexity and scope. Develop analysis and design of systems and/or programs. Analyze, develop, write, document, test, debug and implement programs, stored procedures and reports. Work with basic application system designs and specifications utilizing appropriate standards, procedures, and techniques. Adhere to standards, design, documentation, and testing while maintaining appropriate quality levels. Actively participate and/or lead troubleshooting procedures to assist in correction of system problems. Participate in user consulting, systems analysis, general systems design, detail systems design and work involving vendor contracts. Participate in creation of technical documentation throughout software development lifecycle. Design, create, implement and maintain applications. Prepare documentation of programs and create design specifications using flowcharts, narratives, test data, schedules and report formats. Analyze and correct problems in existing systems and develops processes to maintain, correct or enhance existing systems.

Minimum Qualifications: BS/BA in computer science or equivalent combination of education and experience; minimum two (2) years' experience in developing, testing, deploying, and maintaining data-driven applications in an object-oriented programming environment using Microsoft™ Technologies. Design and development skills in both Web and Windows environment. Experience across full life cycle application design and development. Development experience in using Microsoft™ Technologies (VB, VB.NET, ASP, ASP.NET). Programming experience in Microsoft™ SQL Server (transact-SQL, stored procedures, etc.). Web development and Microsoft™ Share Point technology background a plus. Development experience in report writing utilizing Crystal Reports. Experience in creating Object-Oriented designs and implementations. Ability to work in an application development team environment on assigned coding, testing and documentation phases of a development project. Excellent analytical and problem solving techniques. Certifications in Microsoft™ technologies a plus.

Application Instructions: Interested and qualified candidates who meet the above requirements should submit a cover letter, a resume, and salary requirements to:
